## BOUND FOR GREATNESS

BY SHANA REED

Welcome to our Fall Issue of 2018. We've been up to some pretty cool things here at Upward Bound! Our students are trying new things, tasting new foods, exploring new places, and having fun while doing it all! We've had a great semester- here's a little sneak peek for all our supporters.

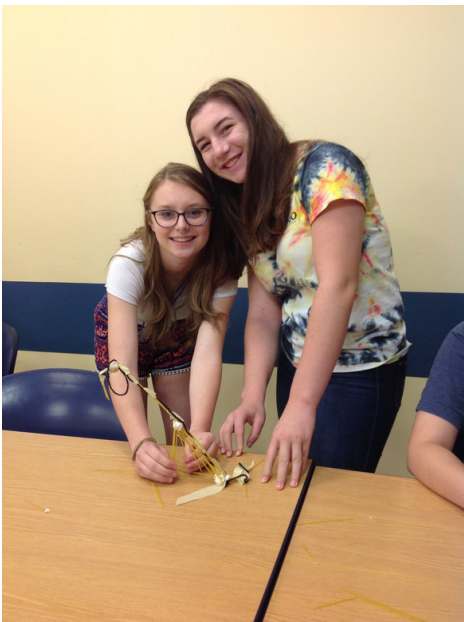

# September Saturday Program

In September, we welcomed students back with New Student Orientation, Google Classroom set ups, and team building and leadership challenges.

**Fun Fact:**  
Pawpaw fruit  
are native to  
West Virginia

Students went to the Core Arboretum for a nature walk led by WVU Biology Professor, Zach Fowler, where they tasted pawpaw fruit. At the Craft Center in Towers, students learned beading techniques and worked on glass fusing projects.

# OCTOBER SATURDAY PROGRAM

**For Our October Saturday Program, we went to the WVU campus for college prep sessions and Discover WVU Day. Freshmen, Sophomores, and Juniors participated in college prep presentations, while Seniors and their parents participated in a FAFSA workshop and completed college admissions forms and scholarships. Students also enjoyed residence hall tours and information booths about majors and programs offered at WVU.**

# UB STUDENTS GO TO FAIRMONT STATE UNIVERSITY

Upward Bound students took a field trip to Fairmont State University to tour the campus, meet staff members, and learn about FSU's academic programs and majors.

Our students asked questions, explored campus, and ate in the dining hall to experience a day in the life of a college student.

# NOVEMBER

Saturday Program

UB STUDENTS VISITED THE FAIRMONT STATE CAMPUS TO LEARN ABOUT FSU'S HIGHER EDUCATION OPPORTUNITIES

## **DECEMBER SATURDAY PROGRAM STEM DAY**

At UB STEM DAY, we went to a Chemistry lab to watch WVU faculty and graduate students demonstrate experiments. Students got to do their own experiments and made nylon chains by mixing sebacoyl chloride and hexamethylene diamine. Afterwards, students participated in WVU's Hour of Code where students went to coding seminars and workshops, and enjoyed an undergraduate-led tour of a Plasma Lab in White Hall.
